

FortiClient VPN installation

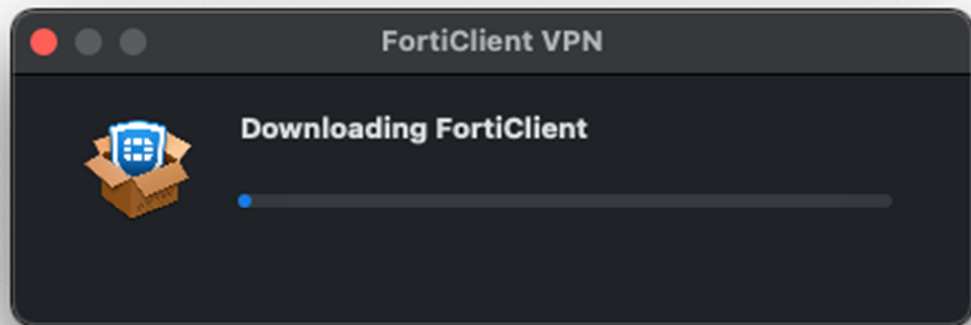

1. Download FortiClient VPN from this link:

https://szoftver.elte.hu/files/vpn/FortiClientVPNOnlineInstaller_7.0.dmg

2. Open the downloaded .dmg file, and run the FortiClientUpdate application

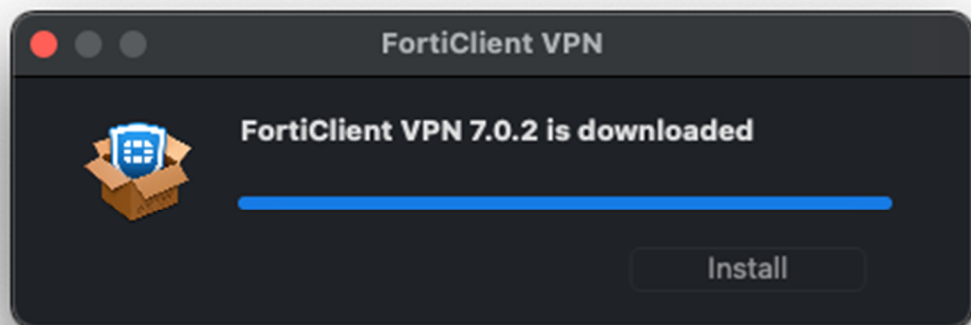

At the warning, click on "Open" button.

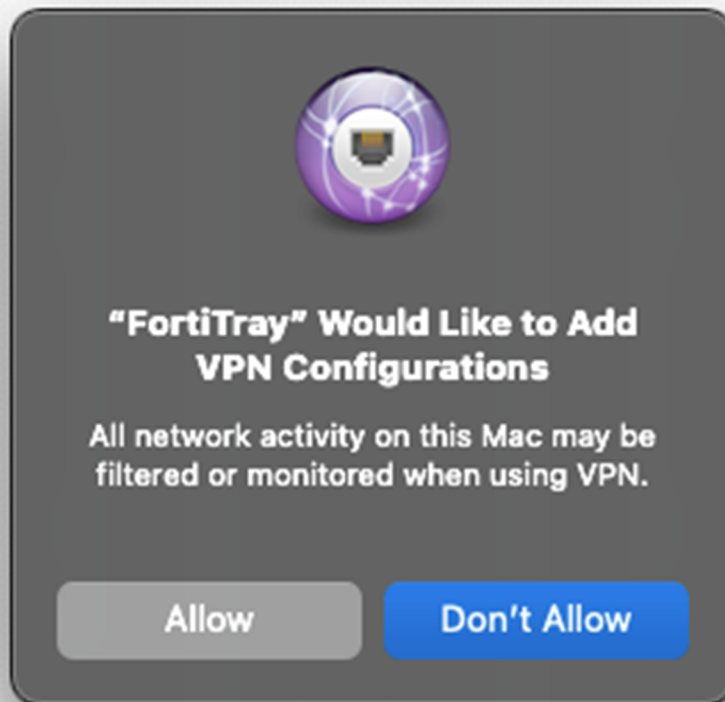

After this step the FortiClient downloading process will be started.

3. After the downloading process is completed, click on "Install" button.

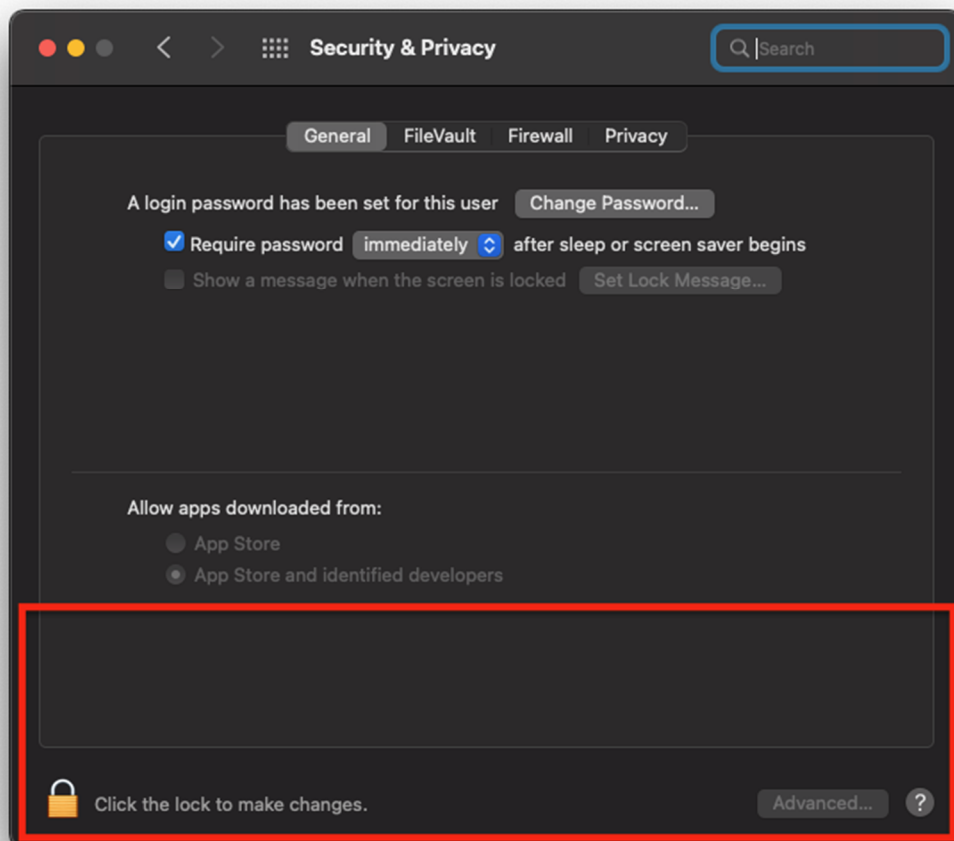

4. On the pop-up window choose "Agree with the licence agreement", then "Install".

5. After the installation process is completed, it will warn you to allow “FortiTray”, then click onto “Allow” button.

6. At the end of the installation process, you will have to check if FortiTray has been surely allowed, in the System Preferences > Security and Privacy menu. The system will warn you at the bottom of the page. In case it is necessary, open the lock with your password/Touch ID and allow it.

7. The process is finished!
