ELTE VPN Client Download and Installation Guide for Linux

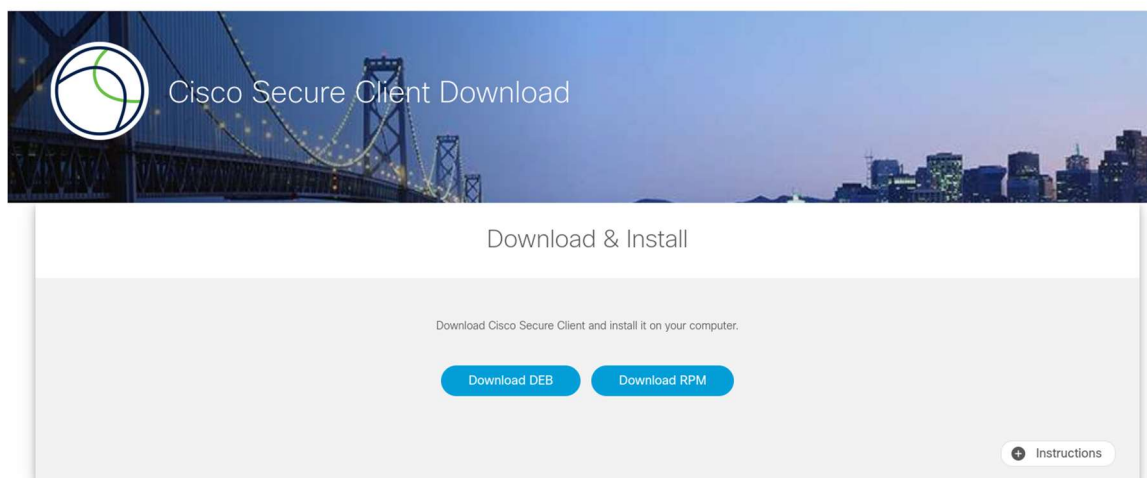

1. Download the installation package from: <https://vpn.elte.hu/ms>

Log in using your ELTE e-mail address and the corresponding password.

The image shows the ELTE VPN sign-in page. At the top is the ELTE logo and name. Below it is the heading "Sign in". There is a text input field labeled "e-mail cím / email address". Below the field is a link "Can't access your account?". At the bottom of the form are two buttons: "Back" and "Next". Below the form is a grey box with Hungarian text: "Amennyiben kérdése van vagy hibát tapasztal, a 6800-ás központi hibabejelentőn és az operator@elte.hu címen munkatársaink állnak rendelkezésre". At the very bottom is a section titled "Sign-in options" with a key icon.

2. After the multi-factor authentication, download the installer by clicking on "**Download DEB**".

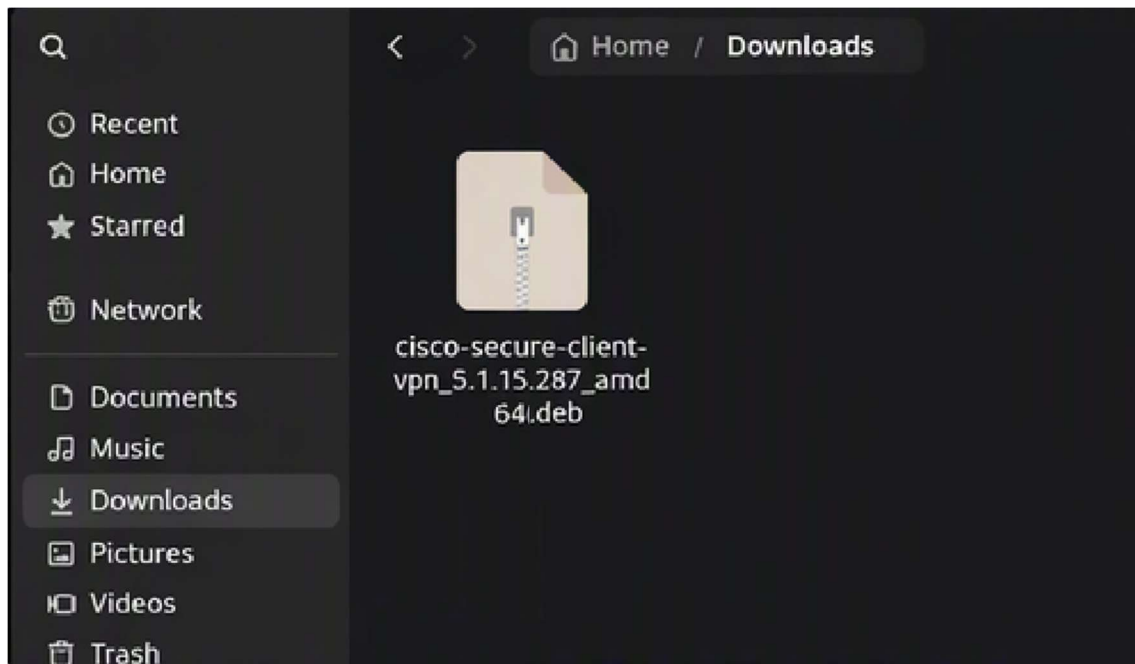

Cisco **SECURE**
Secure Client

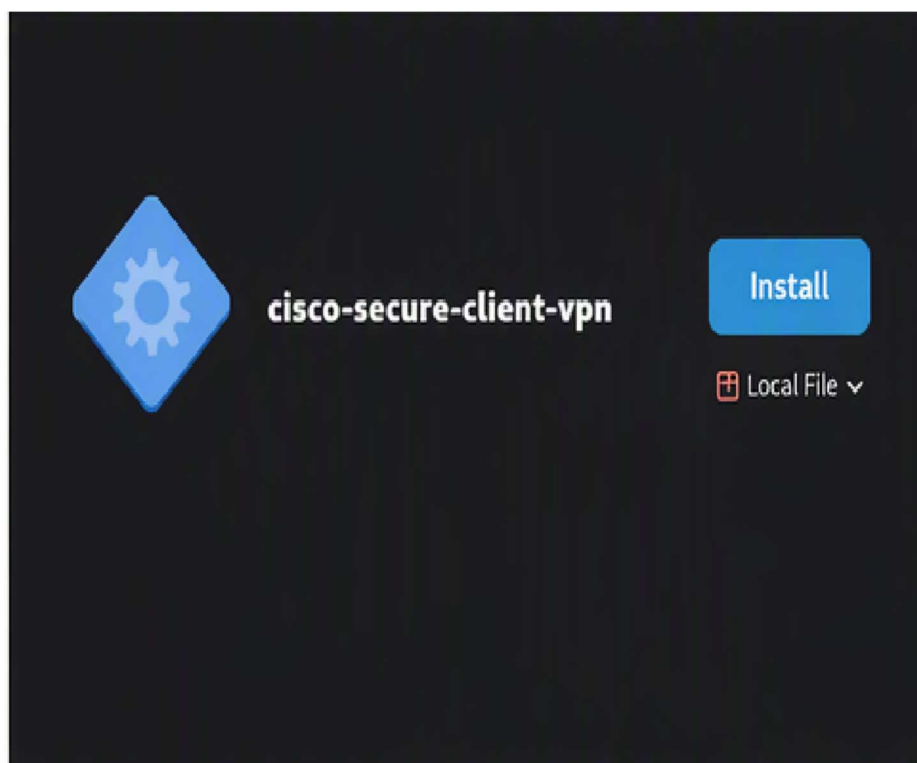

Note: choose the **DEB** version if you are using a Debian-based Linux distribution (for example: Ubuntu, Linux Mint, Debian, etc.). Choose the **RPM** version if you are using another distribution such as Fedora, Red Hat, etc.

3. Locate the downloaded file, right-click it and open it with your software installer.
Alternatively you may install it from the terminal if you prefer.

4. In the installation window, click "**Install**".
